Research Interests

I'm pursuing my research with a guiding belief: "**AI must be of humans, by humans, and for humans.**"

I aim to build a J.A.R.V.I.S.-like Proactive AI assistant that integrates visual cues such as gaze and individual user personas, while autonomously identifying and continually developing proactive assistance skills.

- **Human-Centered AI:** Human-Centered AI Agents, Personal World Models, Proactive AI, Proactive Procedural Assistance, Personalized Assistance.
- **Self-Evolving AI:** Planner Evolution, Planner–Policy Co-evolution, Continual Learning, Learning from Feedback.
- **Video Understanding:** Video Temporal Grounding, Fine-grained Video Understanding, Streaming Video Understanding, Hierarchical Procedural Understanding.
- **Self-supervised Learning:** Representation learning with limited supervision, World Model.
- **Data-efficient Learning:** Semi- and weakly supervised learning, Learning with Noisy Labels, robust learning, and domain generalization.
